### 3.Product Feature And Application

Some things we suggest having before painting are: drop cloth, flat surface to work on, palette with water wells (plastic), apron, roll of paper towels, cup of water for washing brushes, a secondary smaller cup of water for diluting paints, sketching pencil, synthetic or sable paint brushes, color wheel.

Tips and techniques: watercolor paint comes in three different forms—tubes, cakes and pencils. Watercolor cakes and pencils both need water to activate the pigment. Watercolor paint works best on watercolor paper. Before getting started, it's always best to have an initial sketch of what you plan to paint laid out on your work surface. This is known as your foundation and will help you as you build your masterpiece. Watercolors can be opaque or transparent. You can achieve different levels of transparency by adding a small amount of water at a time. Watercolor paint tubes are
